SUPERFUND REMEDIAL BRANCH

Dear Mr. Ceto:

We have recently been working with Pintlar Corporation of Kellogg, Idaho on testing of contaminated soils and have, a few months ago submitted a bid proposal for asbestos abatement on one structure.

In addition to soils remediation, we have the capability of handling all levels of professional services regarding the asbestos abatement. We can provide reports to you to determine the entire scope of work needed at Bunker Hill, and all necessary documentation for same. We have included the resume of our asbestos specialist for your consideration.

We are in the process of hiring and certifying local unemployed miners for abatement work throughout the Inland Northwest. We believe that utilizing our local work force is best for the community in which we live.

Again, if you are in need of our certified personnel to handle the reporting of the scope of work at Bunker Hill, or any other site, please don't hesitate to call at your convenience.

Sincerely,

J. Johnston
